

UNILITE_®

WELCOME

#BUILTTOUGH

Unilite has built lights tough since 1981. It remains family run, just like it was at the very start when there were only 2 members of staff. The range back then was limited to just a handful of product lines. Wind the clock forward 41 years and now there are over 125 products, all with that same Built. Tough. DNA.

CORE PRODUCT RANGE

Our core product range is still based on superior portable lighting but has now fully migrated over to the latest LEDs. The only bulbs left in the company are growing in the grounds of Unilite HQ! This core product range features site lighting, inspection lights, head

torches and flashlights. Simply put, these have been designed for your working environment and to make your life easier.

NEW PRODUCT LINES

In addition to lighting, we have expanded into several key product ranges including safety glasses, hardened waterproof cases, and a full and varied range of merchandise. You can even see how they 'measure up' with our new industrial heavy duty tape measures. These aren't merely a 'flash' in the pan but are instead carefully thought-out product extensions that naturally compliment our existing range. Every product that rolls off the production line has the Built. Tough. DNA. flowing through its veins.

TALK TOUGH

Anyone can "talk tough". We back it up with rigorous testing and superior construction materials. These materials are chosen at the start of the design process to ensure they keep your Unilite tough, yet lightweight. When the electrical components are chosen, we think quality over everything else. When they are eventually put through their paces in testing, we iron out any flaws and ensure that the final product reaches both ours and your high standard. As well as in house testing, we test to impartial ANSI FL1 standards which is where we get our final product specifications from including lumens, runtime and IP ratings.

LITHIUM POWER

Powering most of our lighting range is the next generation of lithium batteries. These are naturally better for the environment than disposable batteries and we work carefully within our supply chain to minimise the environmental footprint of our product manufacturing. This environmental spirit is carried over to our packaging, with an average of 90% of our packaging now being recyclable. We will keep pushing towards 100%.

THE BEST STAFF

Behind every great company are great employees. Ready to help with your enquiries, our support and sales team can tackle any enquiry with their

extensive product and industry knowledge. The marketing and design team create impressive visual displays and marketing material that help to 'shine a light' on the product's best features. With a passion for what we do, the Unilite team have all the requisite skills to help you.

BRIGHT FUTURE

Of recent years the company has grown from strength to strength. With a tripling of our turnover, the securing of 10 worldwide exclusive distributors, doubling of the number of employees in the UK as well as a new cutting-edge HQ's, it's safe to say the future is looking very bright indeed.

We hope you look forward to using our products as much as we have enjoyed designing and making them for you.

The Unilite Team
